### **DETAILED ACTION**

#### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hind et al.(US 7,069,452) in view of Tamai (US 6,678,573).

Claims 1-8: Hind disclose personal computer interconnected with a sewing machine and transmitting and receiving data signatures in (col.1,lines 50-55;col.3,lines 36-45). Hind does not specifically disclose sending hexadecimal value. Examiner takes official notice that hexadecimal is well known in the art. One of ordinary skill in the art would have been motivated to employ hexadecimal system in order to communicate between the device and a digital computer. Hind disclose personal computer disclose issues and sends authentication response signature which is consisted of sequential ASCII-equivalent byte values and inform the PC that the connection is authenticated and established in (col.3,lines 57-67;col.4,lines 55-67;col.19,lines 3-24). Hind does not specifically disclose utilizing a standard Universal Serial Bus communication link. Tamai disclose USB communication link in (col.3,lines 17-32). It would have been obvious to person of ordinary skill in the art at the time invention was made to employ USB communication link as taught in Tamai with system of Hind in order to provide high speed connection thus enhancing overall data delivery quality.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 2135

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear as to what is meant by "the desired state".

***Claim Objections***

Claim 8 is objected to because of the following informalities: "said network(NET)" It should be said computer network (NET). Appropriate correction is required.
